SKILLS

HTML/CSS

- HTML5
- CSS3
- Responsive Design
- Tailwind CSS
- Flexbox and Grid Layouts

Languages and Frameworks

- JavaScript
- React.js
- Next.js
- Node.js (Express.js)

Database Management

- NoSQL (MongoDB)

Version Control Systems

- Git
- GitHub

Auth

- JWT
- OAuth

Others

- RESTful APIs

EDUCATION

Computer Science

University of Benin

2020-2024

PROFILE

A passionate Full Stack Web Developer based in Nigeria with lots of hands-on experience in building dynamic and responsive web applications. My journey in web development has allowed me to master a range of technologies, including JavaScript, React, Next.js, MongoDB, Express, Tailwind, and TypeScript.
I thrive on solving complex problems and creating efficient, user-friendly solutions. My portfolio showcases projects that highlight my ability to design and implement robust web applications from the ground up.

PROJECTS

Shopparel
https://shopparel.vercel.app

- Created a comprehensive fashion ecommerce web application using Typescript, React for a dynamic frontend, Express for a robust backend, and MongoDB for efficient data management.
- Led the end-to-end development process, seamlessly integrating Typescript throughout the stack ensuring a modern, type-safe codebase for enhanced reliability and maintainability.
- Implemented responsive user interfaces with React, while optimizing data handling through MongoDB, ensuring a seamless shopping experience and efficient backend functionality for the fashion ecommerce web app.

Pikxr
https://pikxr.onrender.com

- Developed a dynamic social media web application, Pikxr, using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Led end-to-end development, implementing robust backend functionality with Node.js and Express.js, seamless frontend experiences with React.js, and data management using MongoDB.
- Implemented JSON Web Token (JWT) authentication to bolster security measures within Pikxr, ensuring a safe and reliable user authentication process.

Web Dev Stories
https://web-dev-stories.vercel.app

- Engineered a dynamic blog web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Typescript for static typing, delivering a user-friendly and responsive experience.
- Skillfully integrated Typescript for enhanced frontend development, implementing robust backend functionality with Node.js and Express.js, and ensuring seamless user experiences with React.js. Additionally, managed efficient data handling through MongoDB for the blog web app.
- Strengthened the security of the blog web app by incorporating JSON Web Token (JWT) authentication, ensuring a secure and reliable user authentication process for enhanced user data protection
